Phone with Nuisance Call Blocking & Answer Machine

Providing essential call blocking features, great sound, reliable range and a whole host of features this is the perfect cordless phone for any home. Say goodbye to unwelcome calls with the latest landline cordless phone from this award-winning call blocking technology capable of blocking 100% of nuisance calls. This phone is a sleek and sophisticated home phone with excellent sound quality, reliable range and an array of useful features to take advantage of.

Nuisance Call Blocking

With this phone you can block incoming calls from common types of nuisance callers - e.g. international, withheld, unknown or payphone numbers. And when you don't want any calls at all to your landline simply switch on the Do Not Disturb mode and enjoy peace and quiet (and peace of mind!).

Easy to Use

Set-up your phone in a matter of seconds thanks to this Advanced Phone's plug-and-play installation. On screen prompts will guide you through initial set-up and the large 1.8" backlit display coupled with the simple layout and navigation of the menu make this one of the most user-friendly BT phones.

Answer Machine with 30 Minutes Record Time

Don't miss out on important messages. This Advanced phone has an integrated answering machine that can store up to 30 minutes of messages. Perfect for holidays and you can even access and listen to messages remotely! The answering machine can also be used for call screening so you can listen to a message as it's being recorded and decide whether or not to pick up the call.

Why should you buy this cordless phone?

Providing essential call blocking features, great sound, reliable range and a whole host of features this phone is the perfect cordless phone for any home.

Basic Specifications

Manufacturer's Part Number: 090658

Call Services: Call Waiting, Call Transfer, Call Block

Total Number of Wireless Handsets: 2

Product Type: Cordless phone answering system with caller ID + additional handset

Cordless Phone Standard: DECT/GAP

Display: LCD display - monochrome - Yes

Product Description: Cordless phone - answering system with caller ID + additional handset

Speakerphone: Yes

Dimensions & Weight (Base)

Depth: 4.5 cm

Height: 12.9 cm

Weight: 128.8 g

Dimensions & Weight (Handset)

Width: 5.1 cm

Depth: 3.5 cm

Height: 17.8 cm

Weight: 123.2 g

Answering System

Recording Capacity: 30 min

Phone Features

Cordless Phone Standard: DECT\GAP

Call Services: Call Waiting, Call Transfer, Call Block

Caller ID Type: Caller ID

Max Handsets Supported: 4

Max Handset Operating Distance: 50 m

Max Handset Operating Distance (Outdoor): 300 m

Dialer Location: Handset

Conference Call Capability: Yes

Speakerphone: Yes

Volume Control: Yes

Ring Tones: 10

Handset Locator: Yes

Indicators: Visual ringer light

Additional Functions: Call timer, built-in clock, Alarm, Intercom, keyboard lock

General

Product Type: Cordless phone answering system

Additional Handsets Qty: 1

Total Number of Wireless Handsets: 2

Battery

Battery: AAA type

Capacity: 550 mAh

Technology: Rechargeable - Nickel Metal Hydride

Talk Time: Up to 720 min

Standby Time: Up to 120 h

Display

Type: LCD display - monochrome

Display Location: Handset

Diagonal Size: 1.8"

Backlit: Yes

Phone Memory

Phone Directory Capacity: 100 names & numbers

Caller ID Memory: 10 names & numbers

Miscellaneous

Placing / Mounting: Table-top

Elegant Design

Boasting a unique shape, this is as much a design statement as it is an excellent cordless phone. The base doubles up as a charging cradle, which the handset slots neatly into with the aid of a small magnet.

Nuisance Call Blocking

If you are fed up with receiving endless nuisance calls, then this is the ideal cordless phone. With the ability to block all anonymous calls, it can massively reduce the number of nuisances calls you receive from the moment you start using it. What's more, there is also the option of blocking individual numbers or prefixes- so if the same numbers keep calling, you can stop them from getting through.

Sample picture only

Answer Machine

This phone has a built-in answering machine with up to 30 minutes recording time. With clear sound, you'll never miss a message again, and there's also the option to record your own personalized greeting. When you have a new message, the blue LED on the exterior of the handset flashes to let you know.

Additional Features

Also includes a number of additional features to make it even more useful. A Do Not Disturb mode ensures the phone won't ring between set hours unless the call comes from a predefined VIP number. If you are concerned about potentially harmful radiation, then this handset also features an eco-mode which can be toggled on or off.

Why Should You Buy This Cordless Phone?

Combining elegant design with superb functionality, this phone really stands out from the crowd. It's the ideal choice for modern homes.

Telephone information:

- 120 name and number memories.
- 40 ringtones.
- Last number redials.
- Caller ID.
- Call log.
- Handsfree facility.
- Speaker and ringer volume control.
- Up to 18 hours talk time/ 200 hours standby.
- Up to 50m indoor range/300m outdoor range.
- Out of range indicator.
- Low battery indicator.
- 2 - Blocks a specific list of numbers and common nuisance call types e. G. International or withheld numbers.
- Answer machine recording time 30mins.
- Personalized recording facility.
- Manufacturer's 1 year guarantee.

Product code: B0013054MY

A premium new digital cordless phone and answering machine with exceptional audio quality, high performance features, and plug-and-play set up. Made in Germany to the highest standard, this phone comes with a 2-year guarantee. And with range of up to 50 metres indoors and up to 300 metres outdoors you'll be able to enjoy calls throughout your home.

Advanced Cordless Phone Designed for Ease-of-use

This cordless telephone provides the perfect symbiosis of design, ergonomics and power for maximum comfort and convenience when telephoning. The slim design makes it easy to hold and combines an elegant appearance with modern technology: Smart and compact on the outside and full of practical ideas inside, this reliable family phone is wonderfully user-friendly. Thanks to the outstanding voice quality and optimum acoustics, making phone calls becomes a pleasure.

Phonebook and Call Management

Make managing your contacts as easy as possible with its large address book, which can store up to 200 contacts (with first and last names and up to 3 phone numbers per contact). The programmable speed dial keys will put you in touch with whoever you're calling without having to key in long numbers. Another practical touch is the VIP tune, allowing you to instantly recognise particularly important callers just by the ring tone. In addition, you can easily exchange address book entries between all your connected Gigaset mobile units.

First-class Audio

Enjoy crystal clear conversations on your landline whether talking hands-free on the excellent loudspeaker or through the earpiece. Volume can be adjusted to suit (5 levels for handset volume and hands-free mode) and the handset is fully hearing aid compatible. This phone also includes a range of personalisation options so that you can adjust the phone to suit your habits and preferences. For example, choose between 2 acoustic profiles, to give the right frequency range for your optimum hearing experience.

Protection from Nuisance Calls

Take advantage of the "Block anonymous calls" function to ensure peace and quiet at home. This function means that calls without a caller ID are only visually displayed or can be blocked completely without disturbing you. In addition, you can programme it to silence the ringer at certain times of the day to ensure you aren't disturbed at meal times or through the night. Contacts from your address book that are marked as VIPs, on the other hand, can be viewed and heard at any time.

Plug-and-play installation

The convenience of it starts straight out the box with the plug-and-play set-up. Then there's the clearly contrasting, large TFT colour display offering plenty of useful features and simple menu interface that is intuitive to use. Combined with the widely spaced illuminated keys and optional large font settings it reaches new heights of intuitive operation and convenience.

ECO Mode

Like all Gigaset Cordless Phones, this one comes equipped with environmentally friendly ECO DECT technology. This means your cordless phone is radiation-free in standby mode, even if more than one handset is being used, as long as the base and all the registered handsets support ECO DECT. During a call, the transmission power automatically adapts to the distance between the base and the mobile unit. The shorter the distance from the base, the lower the radiation. For maximum DECT range, you can deactivate the ECO DECT mode at any time.

- HD Sound for best call quality
- Advanced full duplex loudspeaker
- Slim design with beautiful large 2.2" TFT full colour display
- Phonebook for up to 200 contacts with 3 telephone numbers each
- Flexible stand-alone base with integrated answering machine

4K Mirrorless Camera -

The professional grade mirrorless camera accepts over 30 Micro Four Thirds [MFT] and DC compact interchangeable lens built on the next-generation interchangeable lens camera [ILC] standard MFT [Micro Four Thirds] pioneered.

This mirrorless camera design enables a lighter, more compact camera bodies and lenses. This body and MFT lenses include cutting-edge technologies such as; 4K video capture with 4:2:2 10bit and VLogL compatibility, Wi-Fi + Bluetooth for faster wireless image transfers.

Depth from Defocus autofocusing, combined lens plus camera image stabilization (Dual I.S2 x1x2), and exposure technologies not possible with traditional DSLRs. Now with exclusive 4K / 6K PHOTO Modes, simply select that perfect moment from video to produce printable high-resolution photos. Never miss the moment again with this!!!

Product code: B0013425MY

Massive 80MP RAW Capture

A High-Resolution special mode yields 80-megapixels in RAW recording by shooting the 20.3-megapixel sensor 8 times to create a single image.

Improved Focus Detect & Selective AF

A Joystick Controller on the back can be used to smoothly and intuitively select focus blocks inside the focusing area grid overlay. A new 225-Area AF focus detection area massively increased from 49 to 225 points. The Custom Multi AF mode enables free selection of blocks inside the 225 focusing area.

Massive 0.83x OLED Viewfinder

A massive super high-resolution 3,680k-dot OLED Live View Finder (LVF) improves visibility and makes for perfect framing even under direct sunlight. With highest-level 0.83x magnification to date and a long 21mm eye point distance, its excellent for people who wear glasses.

Viewfinder Magnification

The viewfinder coverage can be switched to 0.7x, 0.77X, or 0.83x depending on the scene (35mm camera equivalent). Switching is done with the V.MODE button.

Night Mode

When shooting dark scenes like starry skies, this mode suppresses the stimulation of the eyes that are accustomed to the dark. The Live Viewfinder (LVF) and rear monitor can be set separately.

Eliminate Effects of Camera Shake

5-Axis Dual I.S. 2.0 (Image Stabilizer) intelligent compensation yields the equivalent of 6.5-stops in slower shutter speed. Shake is nearly eliminated in both body and lens even at during telephoto shooting. It also works in both photo and video recording, including 4K video. Even lenses not equipped with Optical Image Stabilizers (O.I.S.) can benefit from the in-body image stabilization.

Large Status LCD

A new status LCD instantly confirms the camera's settings. Convenient for shooting with frequent settings adjustments, and for simply framing with the viewfinder and rear monitor.

Professional Dual SD Card Slots

Equipped with dual SD card slots for larger capacity recording and efficient file arrangement. Relay recording allows for swapping a full card out for an empty card for virtually endless recording. A backup mode allows continuous recording on one card, while starting and stopping recording on the other card. Simultaneous record duplicates recording on both cards.

4K 60p Video & Slow Motion Effects

Outstanding video performance with high-precision, silky smooth 4K 60p recording (QFHD 4K: 3840 x 2160 / MP4) equipped with 4:2:2 10bit recording mode and VLogL compatibility. Plus high-speed video recording yields a dramatic slow motion effect in 4K (60 fps max. 2x slower [30p playback]) or Full HD (180 fps max. 6x slower [30p playback]) quality.

Fast Access to Custom Setup

A conveniently located function (Fn) Lever lets you quickly switch between precise custom settings. Great for instantly changing from RAW to JPEG, or shooting while switching between color and monochrome.

Customizable AF

With customized AF settings, adjust AF directionality depending on the scene.

AF Point Scope

Enlarges the subject temporarily by 3x to 10x for confirmation of the focusing position.

Bluetooth 4.2 & Wi-Fi 5GHz Controllable

Image App supports Bluetooth 4.2 (Low Energy Full-Time Camera Connection) for shutter release and video record Start / Stop, then automatically switches to Wi-Fi 5GHz (IEEE802.11ac) for faster image transferring.

High-Performance Shutter

The shutter unit is durable for approx. 200,000 times release. Not only does it offer the highest shutter speed at max. 1/8000 to capture fast-moving 'spur-of-the-moment' shots, but you can achieve impressive de-focus effects with fast aperture lenses under bright light.

USB Power Supply

USB power supply compatibility. Shoot while connected to the battery charger and eliminate worry about the remaining battery power. A useful feature for nature photography when you need to wait patiently for the shot to happen.

USB Power Supply

USB power supply compatibility. Shoot while connected to the battery charger and eliminate worry about the remaining battery power. A useful feature for nature photography when you need to wait patiently for the shot to happen.

- 12-60mm f/3.5-5.6 Asph Vario Lens -

For everyone interested in a modern alternative to bulky DSLR interchangeable lenses, Mirrorless Micro Four Thirds lenses deliver impressive, no-compromise optical performance. The durable, all-weather 12-60mm F3.5-5.6 Lens features the highest standards of detail and sharpness.

Built for travel and great photo and video capture, it comes complete with a splash and dustproof sealed body And with Dual I.S. (Image Stabilization) compatibility, you'll shoot with unprecedented hand-held stability anywhere you go. Make the move from bulky DSLRs to smaller, lighter, more compact Mirrorless Micro Four Thirds system cameras and lenses.

Mirrorless Portability And A Versatile Focal Range

From breathtaking landscapes to heartwarming portraits, you'll capture everything you see with this versatile 12-60mm F3.5-5.6 Mirrorless Micro Four Thirds lens. Designed for reliability even under poor weather conditions, this durable lens is all you need for anywhere, anytime photography.

All-Weather Splash / Dustproof Body

Conquer the elements in practically any kind of weather or environment. This tough lens features splash/dustproof construction to shield and protect the inner lens system from sand, rain and more. The perfect lens for heavy field use and shooting in harsh conditions.

Power Optical Image Stabilization (O.I.S.)

Capture ultra-sharp scenes with built-in optical image stabilization (O.I.S.) technology. Achieve consistently clear, blur-free contours across the entire picture using the renowned to instantly compensate for large camera shake and vibration. Power O.I.S. also delivers stable photography without a tripod.

Ideal For 4k Video-Recording

Smart, built-in video support provides smooth aperture adjustments to sudden jumps in exposure, and eliminates impact on audio capture with a silent design. The lens's AF performance adapts to 4K video capture where precise focusing is essential.

Features

- 12-60mm f/3.5-5.6 Asph Vario Lens
- 20.3 MP Live MOS sensor
- Venus Engine image processor
- 3.0-inch free-angle touchscreen LCD
- Continuous shooting up to 60 fps
- UHD 4K recording at 60 fps
- Advanced DFD technology AF
- Dual I.S. 2
- Wi-Fi with NFC, Bluetooth 4.2 LE
- Splash, dust, and freezeproof construction
- DMW-BLF19 Li-ion battery
- Sensor Size: Micro Four Thirds Format
- Resolution: 20 MP
- Max Video Quality: 4K 60fps
- In-Body Stabilization: None
- Special Features: Built-in Flash, Clean HDMI Out, Touchscreen
- Configuration: Body & Lens

Sample picture only

Product code: B0012378MY

Advanced Fast Hybrid Autofocus system; SVGA Tru-Finder. 16-50 mm power zoom lens included.

The Power of Speed

The mirrorless interchangeable-lens camera features ultrafast autofocus (0.06 seconds), 179 AF tracking points and 11 frames per second-while capturing 24.3MP of rich, professional detail. The future of digital imaging is here

Fast Hybrid AF with 179 phase-detection points

Enhanced Fast Hybrid AF (auto focus) combines speedy phase-detection AF with highly accurate contrast-detection AF. Accelerated through a new Spatial Object Detection algorithm, Fast Hybrid AF achieves among the fastest autofocusing performance of any camera (0.06 second).

Ultra-fast response up to 11 fps

Capture the perfect moment – the a6000 realizes 11 frames per second continuous shooting with AF (Auto Focus) tracking by making the most of the wide-area 179-point phase-detection AF sensor. Even when dealing with a moving subject the a6000's superb moving-subject tracking performance ensures you get the shot during still or video capture.

High Resolution 24MP APS-C Sensor

Get incredible detail and gorgeous enlargements thanks to the newly developed 24.3 megapixel Exmor™ APS HD CMOS sensor. It has higher resolution than most DSLRs in a body about half the size and weight. Moreover the a6000 adopts the same gapless on-chip lens structure as the award-winning a7 for ultimate image quality and light sensitivity.

What you see is what you get with an OLED Viewfinder

View every scene in rich detail on the high contrast 1.4M dot Tru-Finder™ OLED Electronic Viewfinder. Featuring a new optical system with four double aspherical lenses, it delivers 100% frame coverage with an approximately 33° viewing angle for corner-to-corner visibility. The advantage of an EVF over an OVF is that the electronic viewfinder displays what will appear in your recordings, including the effects of your camera settings so you can fine-tune exposure, color and focus in your preview before you take the picture.

Frame at any angle with a tiltable 3" LCD

The tiltable 3.0" (921k dots) Xtra Fine™ LCD display makes it easy to photograph over crowds or capture pets eye to eye at low angles. Swinging up approx. 90° and down approx. 45° makes it easy to frame at any angle. The large display delivers brilliant-quality still images and movies while WhiteMagic™ technology dramatically increases visibility in bright daylight.

Smartphone remote control & sharing via NFC & Wi-Fi®

Sharing your gorgeous photos with your family and social networks has never been easier. Wi-Fi™ connectivity allows you to control your camera with your compatible Smartphone or Tablet using the PlayMemories Mobile Apps™. Use your device's LCD to frame your image and control the camera shutter. You can even transfer the images taken directly to your mobile device for quick editing and uploading - sharing has never been easier. Connectivity has been simplified to one-touch utilizing NFC (near field communication). Connect by simply touch the camera to the compatible NFC enabled device.

Enhance your creativity with PlayMemories Camera Apps™

Personalize your camera by adding new features with PlayMemories Camera Apps™. Find apps to fit your shooting enhance your creativity from like; time lapse, motion shot light shaft and much more. Use apps that shoot, share and save photos using Wi-Fi® that make it easy to control and view your camera from smartphone, and post photos directly to Facebook or backup images to the cloud without connecting to a computer. www.playmemoriescameraapps.com

Full HD 1080/24/60P video

Make movie magic with Full HD 1920 x 1080 video in cinematic 24p, or capture fast action at incredible 60p and 60i frame-rates. Tracking moving subjects is not a problem, made even easier with the α6000's 179 point AF (auto focus) system –. Selectable in-camera – Blu-ray quality - AVCHD™ or simple and easier upload to the web - MP4 codecs are available. For serious videographers, uncompressed clean-screen video files to external recording devices is possible via the HDMI® connection. Capture Full 1920 x 1080 HD uncompressed clean-screen video files with external recording devices via an HDMI® connection in 60p and 60i frame rates. Selectable in-camera AVCHD™ codec frame rates include super-smooth 60p, standard 60i or cinematic 24p, while MP4 codec is also available for smaller files for easier upload to the web.

Easy and intuitive controls help you shoot like a pro

Despite its small size, the α6000 gives you full DSLR control and immediate access to the functions you need to shoot like a pro. Two dials on top and a rear-mounted control wheel allow quick selection of shooting modes and camera settings. In addition to the Fn button, there's seven customizable buttons, which can be assigned any of 474 functions.

Stunning low light photos with ISO range of 100-25600

With higher sensitivity due to the newly developed Exmor® CMOS sensor and BIONZ® X processor, you get stunning detail in low light from ISO range 100 – 25000. And for an additional burst of light, the α6000 features a pop-up flash and a standard hot shoe for additional flash accessories.

Low light situations not a problem

Built-in pop-up flash in a compact camera body is perfect when an extra burst of light is needed to get the shot. Combine with high ISO sensitivity - from 100 to 16000 ISO - to enable shooting in just about any setting.

Better Images through BIONZ® X processing

The new BIONZ® X image processor faithfully reproduces textures and details in real time via extra high-speed processing capabilities delivering true-to-life images - as seen by the naked eye. It enables greater natural detail, richer tonal gradations, lower noise and more realistic images whether you shoot stills or video.

4K Still image output by HDMI⁸ or Wi-Fi® for viewing on 4K TVs

Enjoy Ultra High Definition slide shows directly from the camera to a compatible 4K television. The α6000 converts images for optimized 4K image size playback (8MP). Enjoy expressive rich colors and amazing detail like never before. Images can be viewed via an optional HDMI®.

New Eye AF control

Thanks to extremely accurate eye detection, faces will be sharply focused - even when capturing a subject partially turned away from the camera and with a shallow depth of field – as the camera can prioritize a single pupil. A green frame appears over the prioritized eye when focus has been achieved for easy confirmation. Eye AF can be used when the function is assigned to a customizable button, allowing users to instantly activate it depending on the scene.

Powerful imagery is all yours with this Sony Alpha a6000 mirrorless digital camera. It's ultralight thanks to its mirrorless camera design, which means it's thinner and easier to carry than a traditional DSLR, and it has all the performance characteristics of a standard crop-sensor DSLR, including a range of control options that let you alter shutter speed, aperture and ISO within moments. This Sony digital camera takes photos using its 24.3-megapixel Exmor sensor, and the BIONZ X image processing produces impressive color and outstanding clarity even when the ISO is ramped up to 25,600. It also lets you shoot up to 11 photos per second so that you can capture your favorite sporting and fast-moving moments.

All this means that this mirrorless digital camera needs to have an ultra-fast autofocus, and the camera doesn't disappoint. It can hone in on your subjects in as little as 0.06 seconds, and its 179 phase detection points produce impressive coverage across the image. A powerful electronic viewfinder lets you preview the photo with all the effects included, or you can use the tiltable 3-inch LCD to take photos and videos from a wide variety of angles when using this Sony Alpha a6000 mirrorless digital camera.

Test the limits of your creativity with the premium mirrorless DSLR that's focused on speed. Every artistic shot you take - from fast-action to candid - benefits from 24.3MP detail and the world's fastest auto focus. For capturing crucial moments that go by in a blink, the A6000 can shoot 11 photos in one second. It's compact and easy to use, too. Two quick-access dials let you change settings on the fly. Very intuitive.

Compact and Lightweight Mirrorless DSLR

The a6000 is a super-compact mirrorless camera that's about half the size and weight of a typical DSLR, yet it has the same size APS-C sensor as most DSLRs. The interchangeable lenses and E-mount system make the a6000 more versatile than almost any other camera on the market.

High Resolution 24MP APS-C Sensor

Get incredible detail and gorgeous enlargements thanks to the newly developed 24.3 megapixel Exmor APS HD CMOS sensor. It has higher resolution than most DSLRs and adopts the same gapless on-chip lens structure as the a7R for ultimate image quality and light sensitivity.

Better Images through BIONZ X Processing

The new BIONZ X image processor faithfully reproduces textures and details in real time via extra high-speed processing capabilities delivering true-to-life images - as seen by the naked eye. It enables greater natural detail, and richer tonal gradations.

Ultra-fast Response

Capture the perfect moment - the a6000 realizes 11 frames per second continuous shooting with AF (Auto Focus) tracking by making the most of the wide-area 179-point phase-detection AF sensor. Even when dealing with a moving subject the a6000's superb moving-subject tracking performance ensures you get the shot during still or video capture.

Easy and Intuitive Controls

Despite its small size, the a6000 gives you full DSLR control and immediate access to the functions you need to shoot like a pro. Two dials on top and a rear-mounted control wheel allow quick selection of shooting modes and camera settings.

Instantly Connect via NFC and Wi-Fi

Wi-Fi connectivity allows you to control your camera with your compatible smartphone or tablet and the PlayMemories Camera Apps. Frame your shot on your device's LCD, snap the shutter, and then transfer the images directly to your mobile device for quick editing and uploading. And with NFC (near field communication) technology, connecting has never been easier. Simply tap the camera to an NFC-enabled device, and you're ready to shoot and share without wires or hassles.

Stunning Low Light Photos

With 20% higher sensitivity than the NEX-7 due to the newly developed Exmor CMOS sensor and BIONZ X processor, you get stunning detail in low light from ISO range 100 25000. And for an additional burst of light, the a6000 features a pop-up flash and a standard hot shoe for additional flash accessories.

Full HD Output

Capture Full 1920 x 1080 HD uncompressed clean-screen video files with external recording devices via an HDMI connection in 60p and 60i frame rates. Selectable in-camera AVCHD codec frame rates include super-smooth 60p, standard 60i or cinematic 24p, while MP4 codec is also available for smaller files for easier upload to the web.

What You See is What You Get

View every scene in rich detail on the high contrast 1.4M dot Tru-Finder OLED EVF. It delivers 100% frame coverage with an approximately 33° viewing angle for corner-to-corner visibility. Not only that, the viewfinder displays what will appear in your recordings, including the effects of your camera settings so you can fine-tune focus and preview your shots before you take the picture.

PlayMemories Camera Apps

Personalize your camera by adding new features of your choice with PlayMemories Camera Apps. Find apps to fit your shooting style from portraits, detailed close-ups, sports, time lapse, motion shot and much more. Use apps that shoot, share and save photos using Wi-Fi that make it easy to control and view your camera from smartphone, and post photos directly to Facebook or backup images to the cloud without connecting to a computer.

Cover Every Shooting Angle

Snap shots high over crowds or down low to capture a pet's eye view with the tiltable 3.0" (921k dots) Xtra Fine LCD Display that boasts a range of movement of approximately up 90° and down 45°. Easily scroll through menus and preview life thanks to WhiteMagic technology that dramatically increases visibility in bright daylight. The large display delivers brilliant-quality still images and movies while enabling easy focusing operation.

DSLR-like Focusing Speed

Enhanced Fast Hybrid auto focus combines speedy phase-detection AF with highly accurate contrast-detection AF, which has been accelerated through a new Spatial Object Detection algorithm, to achieve among the fastest autofocus performance of any full-frame camera. First, phase-detection AF with 179 densely placed phase-detection AF points swiftly and efficiently moves the lens to bring the subject nearly into focus. Then contrast-detection AF with wide AF coverage fine-tunes the focusing in the blink of an eye.

- Sensor Size: APS-C Camera Format
